Resistine

Resistine ✕

Assistant 3 min

Hey, there is some malware on Mike's computer.

It doesn't have an antivirus.
I can install it and restart the computer... ®

Do it!

Automated cyber-security assistant
powered by AI with easy chat assistant

The system detects and automatically responds to unknown and advanced threats (APTs), and suggests solutions to gradually improve even small and medium organization's cyber-security.

Resistine GmbH & s.r.o. | Berlin - Brno | www.resistine.com

Resistine

Organizations face a long-term problem: A shortage of IT specialists. It's even worse in Cyber-Security. There are no experienced people on the market.

80% of companies has been hacked during last year and Resistine offers solution – An Automated Cyber-Security Assistant, powered by Artificial Intelligence, designed with expertise tailored for SMEs. The system detects and responds to unknown and advanced persistent threats, communicates with user, suggests preventive and reactive measures and executes them. It does so automatically with minimal user and administrator disturbance.

Make the world safer and more free
by revolutionizing Cyber-Security for SME
