#1 in enterprise IT

Your IT partner since 1990

Aricoma is a leading European IT services provider driving digital transformation for pan-European institutions, international enterprises, and clients across European as well as domestic markets. We have well-coordinated teams of experienced experts and a uniquely comprehensive portfolio of services and solutions.

A major player both at home and abroad

Advanced IT infrastructure, a broad portfolio of enterprise applications, digital solutions for a modern state, AI, as well as cybersecurity. We are growing in our home markets and in Western Europe, strengthening cooperation with EU bodies, NATO and other supranational institutions. We are part of the strong international investment group KKCG.

Corporate social responsibility

We believe it is our duty to share our success. That is why we support organisations that help those in need, as well as upholding the values that matter, such as freedom and democracy.

In addition to technology and technological development, we also have a deep understanding of the legislation and how companies and institutions operate.

in annual revenue

1 Enterprise applications

Process automation and the digitalisation of business processes increase efficiency and reduce costs for our customers. Our portfolio includes ERP and CRM systems, applications for project, service and human resources management, BI tools, the use of artificial intelligence, document management solutions, as well as e-commerce and portal solutions.

2 Digital solutions for the modern state

We have many years of experience in the digitalisation of public services and can offer institutions a strategy for delivering modern and efficient services to citizens. In our projects, we apply our knowledge of processes and legislation, as well as the latest expertise in software development, cybersecurity, data protection and artificial intelligence.

3 IT infrastructure

Everything starts with the supply of hardware and software at the right price, followed by the design and implementation of data centre or cloud infrastructure technologies, enterprise networks, solutions for corporate communication and collaboration, and tools for efficient IT management. This is followed by services to support and ensure IT operations.

4 Cybersecurity

We are a leader in cybersecurity and have a strong team of experienced experts. We implement advanced cybersecurity technologies and provide Cyber Defence Center services, including round-the-clock monitoring and rapid incident response.

5 Artificial intelligence

Our expertise and experience in the practical use of AI span areas such as the automation of business processes, data analysis and work within enterprise information systems, cybersecurity, software development, end-user devices and corporate IT infrastructure.

6 Comprehensive IT services

Our system integration expertise enables us to design, implement, and manage complex IT projects for organisations of all sizes. Combining deep expertise in education, artificial intelligence, and quantum technologies with consulting, implementation, and training services, we help organisations accelerate innovation and unlock the full potential of modern technologies.

7 Pan-European services

Our international team delivers a comprehensive portfolio of Aricoma services across Europe, along with bespoke solutions and expertise. We help EU institutions and international bodies improve their IT infrastructure and services so that they best meet the modern needs of European Union citizens and comply with the applicable legislation.
